 - Homelessness Statistics
 - Ad hoc analysis
 - October - December 2014
 - Annual Homelessness Publication - Tables and Chart
 - Housing Options (PREVENT1) Statistics: 2014-15
 - Homelessness Annual Reference Tables 2014-15
 - Health and Homelessness Data Linkage**

For the one-off data linkage of health and homelessness datasets

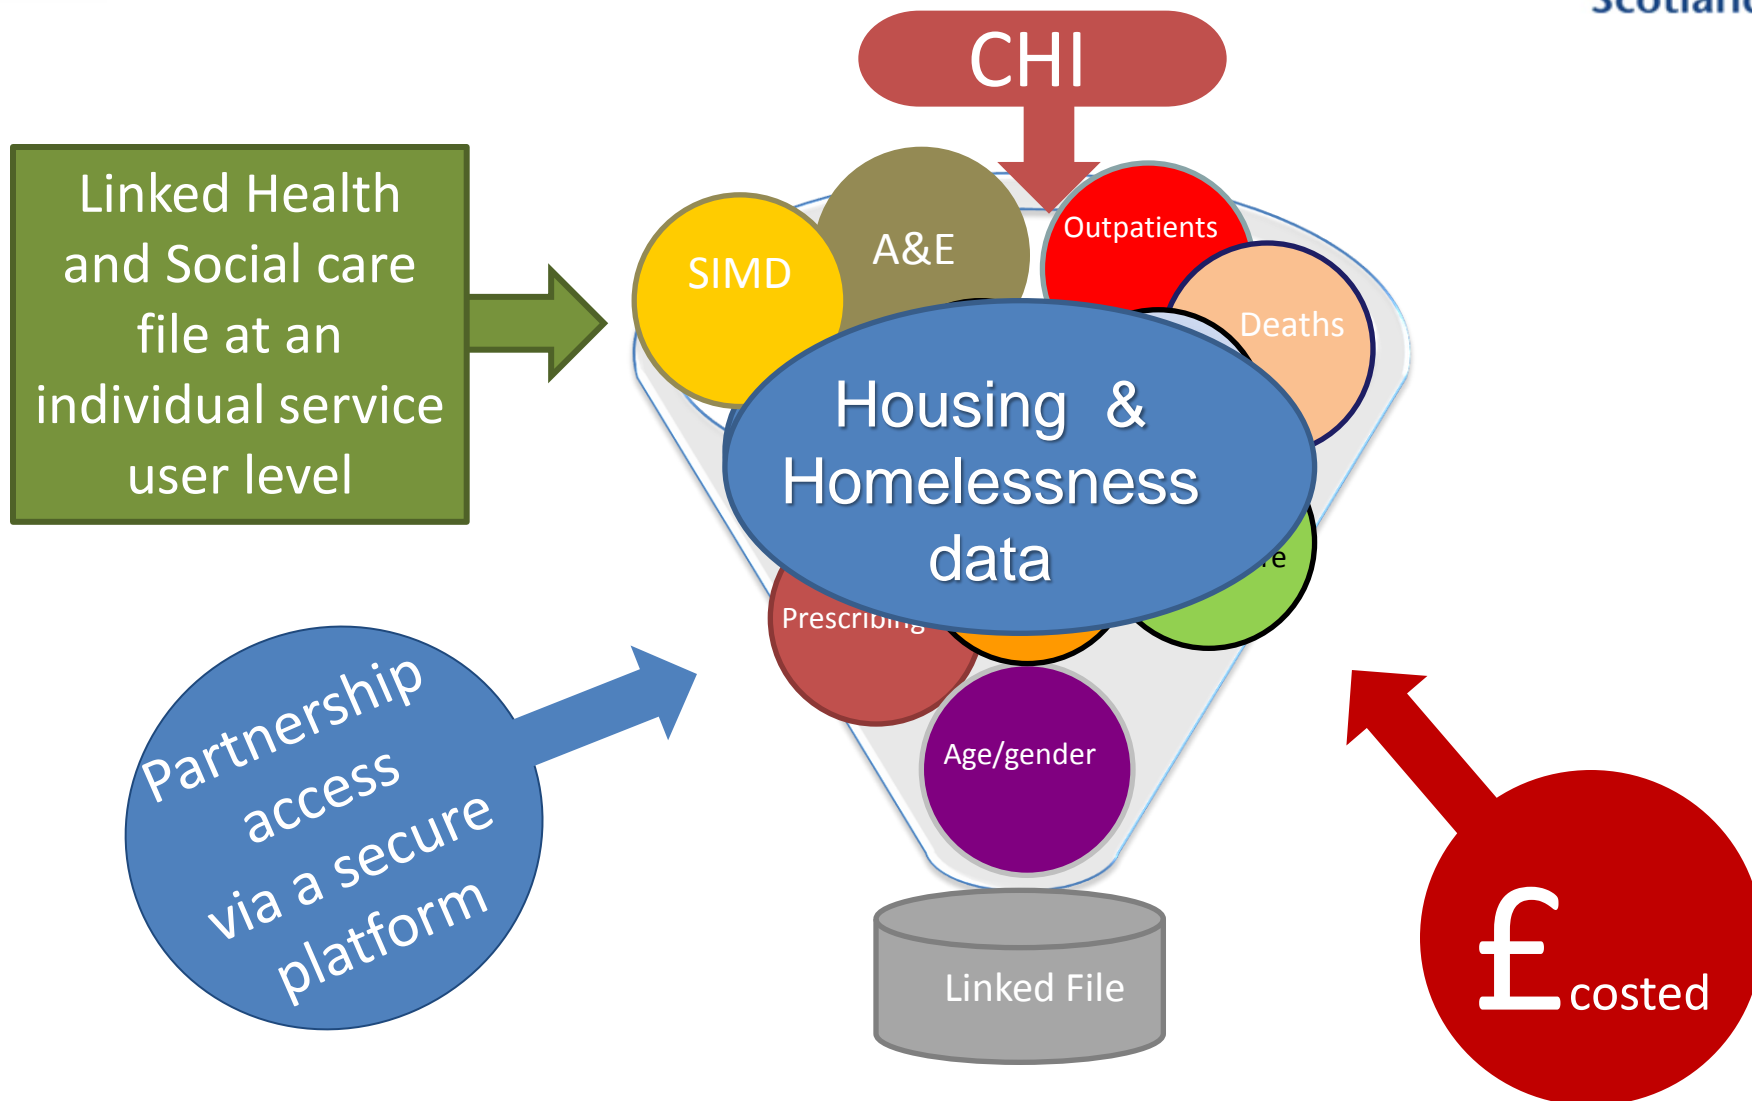

Version 1

28 January 2016

Social Security and Housing Access Statistics

This data specification contains the personal data questions to be used in the linkage of health datasets and homelessness data. The Scottish Government's HL1 and PREVENT1 data will be linked with NHS National Services Scotland data to provide robust evidence on the scale of homeless people's health needs.

Housing underpins wellbeing in society

The Inequality Iceberg

Multiple Exclusion Homelessness is the visible, deeply damaged and vulnerable tip of the health inequality iceberg.

Below the waterline lie all the social, environmental and behavioural drivers and transition points for prevention and early intervention.

An iceberg floating in dark blue water. The tip of the iceberg, which is white and jagged, is above the water. The rest of the iceberg is submerged and appears as a large, dark blue mass. Several speech bubbles of different colors (yellow, red, and dark blue) point to different parts of the iceberg, each containing text.

The Response - 12 Actions:

1. **At-risk population groups, circumstances and key transition points** - for prevention and mitigation
2. **Health Inequalities Strategies** - to include homelessness underpinned by needs assessments
3. **Housing and health literacy** - workforce development on risk factors and routes into homelessness
4. **Psychologically informed environments and services** — accessible person-centred approach

Actions 5-9:

5. **Partnership Pilots** — linking housing, alcohol and drug partnerships, mental health, criminal justice, SPS and DWP
6. **Housing First** — spread across Councils and further evidence the Scottish model for MEH community
7. **Engagement with early-years, schools and colleges** — on awareness of transition points and routes into and out of homelessness
8. **Integration of housing into HSCPs** — focussing on those with most complex needs

Actions 9-12:

9. Data sharing - housing, health & social care data linkage

10. Data analysis - for prevention, mitigation and costing

11. Faculty of Homelessness & Inclusion Health -
workforce development, peer support and shared learning

12. Executive leadership — to champion the home as the
key salutogenic place factor for wellbeing
